

## **Birla Public School, Doha – Qatar** **Circular on Diagnostic Assessment**

Dear Parent

At the outset, let me welcome all of you to the new Academic Year 2022-23. We would like to set pace into the new year by correctly pre-assessing and planning the corrective action to be taken to wipe out learning gaps caused due to the pandemic.

For this we have already assessed most areas of learnings and have been able to find out the certain major sectors as learning gaps through the Term-II examinations. We have come up with certain content and worksheets that we feel will help us to bridge the learning gaps observed in the previous class of your ward. The worksheets will be solved with the students in the first week, at the start of the new session in April 2022, so that all students are benefitted by these Diagnostic Assessments.

The duration of the Diagnostic worksheets will be 1 hour. The questions are both subjective and objective in nature. The topics shall be shared through GCR. These topics have been selected by shortlisting the common errors made by the students during the Annual Examination.

We expect your whole hearted co-operation in bridging the learning gaps and making learning more fruitful for each child.

  
21/3/22  
Harish Sanduja

**Academic Director - Principal**
